

Paralibrarian SIG meeting, August 18, 2009
Presenter Lilian Hoffecker

At the Health Sciences Library, Anschutz Medical Campus in Aurora, Lilian Hoffecker presented a talk about complementary, alternative and integrative medicine. She began by defining what these terms mean, with examples of each, and commented on the numbers of people using these types of treatments. Lilian also gave a list and demonstrated a few authoritative resources to use for reference although research, scholarly sources of information, and evidence-based studies are only slowly being produced in these fields. This was a much appreciated discussion on the topic
